

Nomenclature note

TOMASZ WRZOŁEK

ROZKOWSKAELLA, A NEW NAME FOR DEVONIAN TETRACORAL
TRIGONELLA RÓŻKOWSKA, 1980

WRZOŁEK, T.: *Rozkowskaella*, a new name for Devonian tetracoral *Trigonella* Różkowska, 1980. Acta Palaeont. Polonica, 31, 3—4, p.

Różkowska (1980) established the genus *Trigonella* for a Frasnian tetracoral from the Świętokrzyskie Mts. (= Holy Cross Mts., Poland), choosing as the type species *T. sandaliformis* Różkowska, 1980. The name was subsequently used by Hill (1981: F740). Professor Jerzy Fedorowski has drawn my attention to the fact that the name *Trigonella* has been preoccupied for a modern bivalve by da Costa, 1778 (fide Moore 1969: N595). Therefore, I propose the new name *Rozkowskaella*, in honour of Late Maria Różkowska, an eminent Polish student of Rugosa. The type species and its type specimen remain the same, as it was indicated by Różkowska (1980: 24, fig. 4, pl. 2: 6a—c).

Key words: Rugosa, nomenclatural notes.

Tomasz Wrzolek, Uniwersytet Śląski, Instytut Geologii, ul. Mielczarskiego 60, 41-200 Sosnowiec, Poland. Received: February 1986.
