

On some Famennian Phacopinae (Trilobita) from the Holy Cross Mountains (Poland)

Halszka Osmólska

Acta Palaeontologica Polonica 08 (4), 1963: 495-519

The new Famennian trilobite species *Trimerocephalus dianopsoides* including the meraspid period is described. The mode of moulting in young and adult phacopids and phylogenetic relations of the genera *Cryphops* R. & E. Richter, *Trimerocephalus* McCoy and *Dianops* R. & E. Richter are discussed.
