

Lower Eifelian ostracods from the West Świętokrzyskie Mountains

Jan Malec

Acta Palaeontologica Polonica 34 (3), 1989: 233-270

Twenty-two benthic ostracod species have been described from the lower Eifelian *Partitus* Zone, the *Chimaerothyris dombrowiensis* local brachiopod biozone. The species described by Gürich (1896) and Kummerow (1953) from the lower Eifelian of Dąbrowa have been revised and the following new ones described: *Sulcatiella pusilla*, *Evlanella kielcensis*, *Jefina larga*, *Cytherellina clara*, *Orthocypris magna*, *Bairdiacypris subbafasi*, and *Cryptophyllus nidae*. Neotypes of the following species have been designated: *Rishona obliqua* (Gürich), *Poloniella devonica* Gürich, *Evlanella humiliformis* (Gürich) and *Bythocyproidea polaris* (Gürich).

Key words: Ostracoda, lower Eifelian, stratigraphy, Poland.
