

Les Radiolaires du Campanien inferieur de Cracovie (Pologne)

Hanna Górka

Acta Palaeontologica Polonica 34 (4), 1989: 327-354

Lower Campanian Radiolarians (Polycystina) from outcrops at Cracow (southern Poland) are very abundant and very well preserved. Fifty species amongst spumellarians et nasselarians are described. One genus, *Vistularia*, and four species are new: *Archaeospongoprimum cracoviense* sp. n., *Pseudoaulophacus polonicus* sp. n., *Pseudoaulophacus vistulae* sp. n., and *Vistularia magna* gen. et sp. n.

Key words: Radiolarians, Polycystina, Lower Campanian, Cretaceous, taxonomy, stratigraphy, Cracow, Poland.
