

***Estoniocalis* Obut et Rötsk, 1958 and *Rhadinograptus* Obut, 1960 are not graptolites**

Piotr Mierzejewski

Acta Palaeontologica Polonica 36 (1), 1991: 77-81

Estoniocalis jaervensis Obut et Rötsk, 1958 and *Rhadinograptus jurgensonae* Obut, 1960 from the Silurian of Estonia are redescribed. It is stated that both forms, regarded so far as inoaulid and dithecoid graptolites respectively, have nothing in common with the Graptolithina. These forms are treated as incertae sedis fossils (algae?).

Key words: organic microfossils, graptolites, algae, Silurian, Estonia.
