

Supplementary studies on the insectivores from Węże 1 (Poland)

Andrzej Sulimski

Acta Palaeontologica Polonica 07 (3-4), 1962: 441-498

Some of the insectivore species previously described by the writer (Sulimski, 1959) are revised. One new genus and three new species of the Soricidae are described: *Zelceina* n. gen., *Sorex subminutus* n. sp., *S. hibbardii* n. sp. and *S. kretzoi* n. sp. A description is also given of *Desmana pontica* Schreuder and *D. cf. kormosi* Schreuder - two species thus far not recorded from the Węże breccia, and of the skull of *Erinaceus samsonowiczi* Sulimski.
