

## Two new trilobites from the Treskelodden Beds of Hornsund (Vestspitsbergen)

Halszka Osmólska

*Acta Palaeontologica Polonica* 13 (4), 1968: 605-614

Two new trilobites: *Ditomopyge roemeri spitsbergensis* n. subsp. and *Paladin trigonopyge* n. sp. are described. *D. roemeri spitsbergensis* seems to indicate the Upper Carboniferous age for these beds, as its close relatives *D. roemeri roemeri* (v. Moeller, 1867) and *D. grunewaldti* (v. Moeller, 1867) are known from the Gzhelian Stage of the Urals, Donetz Basin and Voronezh Region (USSR).
