

## A new genus of lucinid bivalve from hydrocarbon seeps

Fiona L. Gill and Crispin T.S. Little

*Acta Palaeontologica Polonica* 58 (3), 2012: 573-578 doi: <http://dx.doi.org/10.4202/app.2011.0092>

We erect a new genus, *Elongatolucina*, for distinctive large, elongate lucinid bivalve specimens from Miocene sediments from Venezuela. We interpret *Elongatolucina* to have had a chemosymbiotic mode of life and it may have been seep-restricted. *Cryptolucina elassodyseides* from Eocene hydrocarbon seep sites in Washington State, USA is incorporated in *Elongatolucina*.
